

RAHUL JAIN

MERN Stack Developer | GenAI Application Developer

rahuljain@gmail.com | +91 7654674787 | Bhopal, Madhya Pradesh | [linkedin.com/in/\[profile\]](#) | [github.com/\[username\]](#)

PROFESSIONAL SUMMARY

Computer Science graduate and MERN Stack Developer with hands-on experience building React.js interfaces, Node.js/Express.js REST APIs and MongoDB data models. Experienced in integrating Large Language Models (LLMs) into web applications, including a Retrieval-Augmented Generation (RAG) legal contract analysis platform built with FastAPI, Claude API and hybrid search (embeddings + BM25). Seeking Software Engineer, Full Stack Developer or GenAI Developer roles.

EXPERIENCE

PN Infosys | *MERN Stack Developer Intern*

May 2026 – Oct 2026

- Developed responsive web pages and reusable UI components using HTML5, CSS3, Tailwind CSS and React.js (Hooks, Context API, React Router), starting from web design fundamentals and wireframes.
- Built RESTful APIs with Node.js, Express.js and MongoDB (Mongoose), implementing JWT authentication, role-based access control and server-side input validation.
- Integrated Google Gemini API into a MERN application to auto-generate [content summaries / product descriptions], adding AI-driven features to the existing user workflow.
- Followed Git/GitHub version control with feature branches and pull requests; tested and documented API endpoints using Postman.

Celonis | *Process Mining Virtual Intern (AICTE)*

Dec 2022 – Feb 2023

- Analyzed business event logs in Celonis to map end-to-end process flows and identify bottlenecks, delays and rework loops.
- Built process-mining dashboards and data visualizations to track KPIs such as throughput time, and recommended data-driven process improvements.

PROJECTS

LexiQ – AI Legal Contract Analysis Assistant | *Python, FastAPI, Claude API, RAG, SQLite, JavaScript, Pytest*

- Developed an AI-powered contract analysis platform that automatically detects legal and financial risks, performs semantic comparison across contract versions, and answers user queries with source citations.
- Engineered a hallucination-prevention layer that validates every LLM output against the source text, with deterministic risk scoring and clause-level traceability.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline with clause-aware chunking and hybrid search (vector embeddings + BM25), backed by Pytest unit and end-to-end tests including mock-LLM validation.

NoteStream AI – YouTube Video-to-Notes Generator | *Python, Google Gemini API, YouTube Transcript API, Prompt Engineering, Streamlit*

- Developed a GenAI web application that converts YouTube video transcripts into structured notes with key points, summaries and takeaways.
- Built an NLP preprocessing pipeline for text cleaning, normalization and duplicate removal, and chunked long transcripts to fit LLM context-window limits.
- Designed reusable prompt templates supporting multiple output formats (bullet notes, detailed summary, Q&A) selectable from the user interface.

BiteReel – Short-Video Food Discovery Platform | *Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, REST API, Postman*

- Engineered the backend for a reels-style food discovery platform, using cursor-based pagination to power infinite-scroll content feeds.
- Designed RESTful APIs and MongoDB schemas for users, food posts, likes and saved items, with indexing for faster feed queries.
- Secured the application with JWT-based authentication, bcrypt password hashing and protected routes; validated all endpoints using Postman.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend & Databases: Node.js, Express.js, FastAPI, RESTful APIs, JWT Authentication, MongoDB, Mongoose, SQLite

Generative AI: LLM Integration (Claude API, Google Gemini API), Retrieval-Augmented Generation (RAG), Hybrid Search (Embeddings + BM25), Semantic Search, Prompt Engineering, Hallucination Mitigation

Tools & Testing: Git, GitHub, Pytest, Postman, VS Code, Streamlit, Celonis

EDUCATION

ITM University, Gwalior | B.Tech in Computer Science and Engineering | CGPA: 6.73

Jul 2021 – Jun 2025

CERTIFICATIONS

- MERN Stack Development** – PN Infosys (2026)
- Career Essentials in Generative AI** – Microsoft & LinkedIn Learning
- [Course name, e.g. Generative AI / Prompt Engineering]** – Great Learning Academy ([X] hours)
- Process Mining Fundamentals** – Celonis
